

Andrew Wheeler

HPE Fellow

Vice President and Deputy Labs Director

CTO and Hewlett Packard Labs

Hewlett Packard Enterprise

Andrew Wheeler is currently Vice President and Deputy Director of Hewlett Packard Labs. His present responsibilities include managing strategic research and advanced development programs focused on next-generation computing platforms and software while driving commercialization of technologies and intellectual property.

As an HPE Fellow, Andrew works across the company to drive innovative technical solutions and identifies industry and technology trends that shape technology and business strategies. As a technical leader, Andrew is actively involved in the growth and development of the HPE technical community.

In his 21 years at HPE, Andrew has held several Chief Technologist and lead architect roles in multiple business groups covering a broad range of products, spanning real-time operating systems to mission critical servers. His areas of expertise covers computer architecture, embedded computing, VLSI design, system architecture, and enterprise computing.

Andrew holds a Master's degree in Electrical Engineering from the University of Arkansas. His patent contributions cover a variety of technologies including primary patents in dynamic power regulation, memory error correction, computer architecture and data storage.
